Full Explanations (Please read)

This Richards Atlas of Lowell is the most complete ever issued here, being the third edition. The first edition we issued in 1896, the second in 1906. This one is 1924; The official plans of the City Engineers, Assessors, Water Departments and others, as well as those at the County Registry of Deeds were consulted.

Brick buildings are colored red; stone are brown and wooden buildings are yellow. Waterways in blue. Large black dots in streets are fire hydrants. Dash lines in streets are trolley tracks. Size of all water mains given in inches. Steam railroad tracks in heavy full lines. Adjoining plate numbers in circles around each map.

The figures in the streets are house numbers. Those in the rear of lots are plan numbers as on record. Figures on many buildings show the height in stories and the dots on the houses indicate fire-proof roofs. Buildings without dots or figures have 2 stories and shingle roofs. The Atlas generally will be found to be correct as to streets, lot lines and buildings etc. but we can not guarantee owners names as they are constantly changing. Far as practicable, all owners names are given in Lowell.

It will be quite a number of years before it will pay to issue another edition, as we furnish corrections every few years, if enough parties are interested. This Atlas is copyrighted and no plates are to be sold at anytime, separately from the Atlas, nor is the price to be reduced at anytime.

We wish to thank all City Officials, whom we consulted and several leading business men, who actively co-operated with us, as well as to our subscribers generally, whose support has made it possible for us to publish this useful work.
